

Sample Apps

Sample Apps

A shell application structure with **Kii SDK** and everything already plugged in the **Sample Apps**.

Also refer [Hello Kii Page in Kii docs](#).

Code

You can simply copy the **Code** below and paste into your existing app to initialize the **Kii SDK**, **AppID**, **AppKey** and **Server Location**.

To initialize use the following code.

```
//
// HelloKii.java
//

package com.kii.world;

import android.app.Application;
import com.kii.cloud.storage.Kii;
import com.kii.cloud.storage.Kii.Site;

public class HelloKii extends Application {

    @Override
    public void onCreate() {
        super.onCreate();

        // initialize the Kii SDK!
        Kii.initialize("qj72og7e9zym", "169c62215f2b4c20bb279d32ee2fd11f", Site.US);
    }
}
```

To initialize use the following code.

```
//
// AppDelegate.m
//

#import <KiiSDK/Kii.h>

#import "AppDelegate.h"

#import "ViewController.h"

@implementation AppDelegate

- (BOOL)application:(UIApplication *)application didFinishLaunchingWithOptions:(NSDictionary *)launchOptions
{
    // Initialize the Kii SDK!
    [Kii beginWithID:@"qj72og7e9zym"
               andKey:@"169c62215f2b4c20bb279d32ee2fd11f"
               andSite:kiiSiteUS];

    // ...

    return YES;
}
```

To initialize use the following code.

```
//
// index.html
//

$(document).ready(function() {
    // initialize the Kii SDK
    Kii.initializeWithSite("qj72og7e9zym", "169c62215f2b4c20bb279d32ee2fd11f", KiiSite.US)

    // ...
});
```
